

Test Report issued under the responsibility of:

TEST REPORT IEC 60950-1

Information technology equipment - Safety - Part 1: General requirements

Report Reference No E122103-A189-CB-1

Date of issue: 2015-08-06

Total number of pages: 62

CB Testing Laboratory UL International Singapore Pte Ltd

Address 20 Kian Teck Lane, #01-00PT, 627854 Singapore

Applicant's name TDK-LAMBDA CORP

NAGAOKA TECHNICAL CENTER

Address R&D DIV

2704-1 SETTAYA-MACHI

NAGAOKA-SHI

NIIGATA 940-1195 JAPAN

Test specification:

Standard IEC 60950-1:2005 (Second Edition); Am1:2009 + Am2:2013

Test procedure: CB Scheme

Non-standard test method: N/A

 Test Report Form No.
 IEC60950_1F

 Test Report Form originator
 SGS Fimko Ltd

 Master TRF
 Dated 2014-02

Summary of Testing:

No tests were conducted

Summary of Compliance with National Differences:

Countries outside the CB Scheme membership may also accept this report.

Issue Date: 2015-08-06 Page 4 of 62 Report Reference # E122103-A189-CB-1

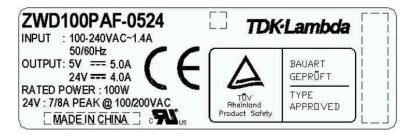

List of countries addressed: AT, BE, BG, BY, CA, CH, CN, CZ, DE, DK, ES, EU, FI, FR, GB, GR, HU, IE, IL, IT, JP, KR, NL, NO, PL, PT, RO, SE, SG, SI, SK, UA, US

The product fulfills the requirements of: EN 60950-1:2006 + A1:2010 + A11:2009 + A12:2011 + A2:2013

Test item particulars :

Equipment mobility for building-in Connection to the mains for building-in Operating condition continuous

Over voltage category (OVC) II

Mains supply tolerance (%) or absolute mains supply

values +10%, -10%

Class of equipment Class I (earthed)

Considered current rating of protective device as part

 of the building installation (A)
 20A

 Pollution degree (PD)
 PD 2

 IP protection class
 IP X0

 Altitude of operation (m)
 up to 2000

Altitude of test laboratory (m) less than 2000 meters

Mass of equipment (kg) 0.45

Possible test case verdicts:

General remarks:

"(see Enclosure #)" refers to additional information appended to the report.

"(see appended table)" refers to a table appended to the report.

Throughout this report a point is used as the decimal separator.

Manufacturer's Declaration per Sub Clause 4.2.5 of IECEE 02:

Yes

The application for obtaining a CB Test Certificate includes more than one factory and a declaration from the Manufacturer stating that the sample(s) submitted for evaluation is (are) representative of the products from each factory has been provided

When differences exist, they shall be identified in the General Product Information section.

GENERAL PRODUCT INFORMATION:

Report Summary

All applicable tests according to the referenced standard(s) have been carried out.

Product Description

This product is an AC to DC supply intended for building-in, Pollution Degree II environment.

Model Differences

- All Models are identical except for the Model designation.

Options Description:

- a) Connector Type,
- "Blank" with Molex Connector
- "J" with JST Connector
- "T" with Terminal Block
- b) Different metal chassis,
- "L" with L-shape metal plate type
- "A" with L-shape metal plate and cover
- c) "FG" with low leakage current (not affecting safety)
- d) "CO" with coating (not affecting safety)

Additional Information

This report is a re-issued report of CB Test Report Ref. No. E122103-A165-CB-1 (Original) due to following modification.

- Upgrade Standard.
- Addition of alternate component, Connector (CN1) (Optional), Type 5273.

No tests were conducted under this investigation due to transfer from CB Test Report Ref. No. E122103-A165-CB-1. All required tests were carried out under the original investigation.

No tests were considered necessary on the above minor modifications because of engineering judgment that the modifications do not have negatively impact to previous test results.

Based on the previously conducted testing and the review of product technical documentation including photos, schematics, wiring diagrams and similar, has been determined that the product continues to comply with the standard.

Issue Date: 2015-08-06 Page 8 of 62 Report Reference # E122103-A189-CB-1

Technical Considerations

- The product was submitted and evaluated for use at the maximum ambient temperature (Tma)
 permitted by the manufacturer's specification of: 60°C for forced air cooling;, 50°C for convection
 cooling
- The product is intended for use on the following power systems: TN
- The product was investigated to the following additional standards: EN 60950-1:2006 + A11:2009 + A1:2010 + A12:2011 + A2:2013 (which includes all European national differences, including those specified in this test report).

Engineering Conditions of Acceptability

When installed in an end-product, consideration must be given to the following:

- The equipment had been tested with an external DC cooling fan providing an airflow of 0.7 m/s. --
- The following Production-Line tests are conducted for this product: Earthing Continuity --
- The end-product Electric Strength Test is to be based upon a maximum working voltage of: Transformer, T1: Primary-SELV: 148 Vrms, 592 Vpk; , Transformer, T2: Primary-SELV: 287 Vrms, 520 Vpk, --
- The following secondary output circuits are SELV: 5 Vdc and 24 Vdc outputs --
- The following secondary output circuits are at non-hazardous energy levels: +5 Vdc and +24 Vdc --
- The power supply terminals and/or connectors are: Suitable for factory wiring only --
- The maximum investigated branch circuit rating is: 20 A --
- The investigated Pollution Degree is: 2 --
- Proper bonding to the end-product main protective earthing termination is: Required --
- An investigation of the protective bonding terminals has: Been conducted --
- The following magnetic devices (e.g. transformers or inductor) are provided with an OBJY2 insulation system with the indicated rating greater than Class A (105°C): T1 (Class B), T2 (Class F) --
- The following end-product enclosures are required: Mechanical, Electrical, Fire --

Abbreviations used in the report:					
- normal condition	N.C.	- single fault condition	S.F.C		
- operational insulation	OP	- basic insulation	BI		
- basic insulation between parts of opposite polarity:	ВОР	- supplementary insulation	SI		
- double insulation	DI	- reinforced insulation	RI		
Indicate used abbreviations (if any)
