EMC Filters EMC 濾波器

IEC inlet filters

IEC插座濾波器

The new IEC inlet filters of B84771, B84773 and B84776 families are originated from the requirements of easy install, compact size, and can be equipped with modular fuse holder and switch. All new IEC inlet filters are available as a standard version or a medical version with reduced leakage current (max. 0.002 mA). The three series offer an extended range of rated current from 1 A to 20 A at 250 V DC/AC and a climatic category(IEC 60068-1) of 25/85/21. Special construction and features of these new IEC inlet filters, e.g. easy plug in or out, easy install, make these filters widely used in SMPS, medical, testing devices and other equipments.
