

■ Main Features

- High efficiency and compact size
- J Plastic enclosure, circuit breaker shape
- J Simplified wiring (no PE connection)
- J Overload 150%
- J Includes (5...15V) and (2x 12...16V) models
- J High operating temperature with no derating

- Ripple and Noise are measured with 20MHz bandwidth, probe terminated with a 0.1µF MKP parallel capacitor.
 Peak current measured after 0.2ms from main connection; 240Vac/50Hz; Ambient temperature at 25°C; Cold Start.
 For NPSM40-515 and NPSM40-12 measures are performed with output set to 15Vdc.

- 4) Start-up type tested: 40° C, possible at nominal voltage with load deration.

Notes:

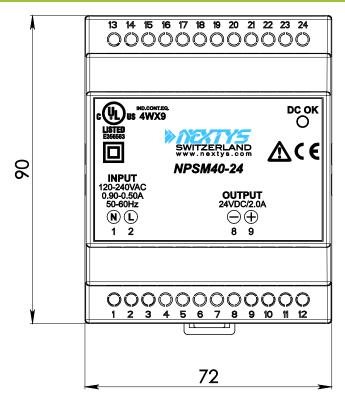

- Technical parameters are typical, measured in laboratory environment at 25°C and 240Vac / 50Hz, at nominal values, after minimum 5 minutes of operation.
- Power rating, losses, efficiency, ripple, thermal behaviour and start-up may change outside of the nominal rated input range. Contact factory for details.

 Data may change without prior notice in order to improve the product.
