7<sup>th</sup> February, 2024

**End of product life notification**

This notification applies to the following products –

NNS15, NNS30, NNS50, NND15 and NND30 series

Dear customer / valued partner,

TDK-Lambda has received notices of obsolescence for key components on the NND/NNS series. These products have been in production for a large number of years having launched 30 years ago in 1994. They are TDK-Lambda's last available linear power supply series with all active ranges now using switch mode technology.

We recognize that as a past or current customer of these products, you may require additional units until substitution testing is complete or for service spares. We are offering a last time buy and ship opportunity as detailed in the table below:

End of life announcement	February 7 <sup>th</sup> , 2024
Last order date	December 6 <sup>th</sup> , 2024
Last shipment date	June 28 <sup>th</sup> , 2025

Please understand that these orders would be non-cancellable, non-returnable and cannot be counted towards future stock rotations. The standard warranty period, service and conditions will apply to product sold during this last time buy notice.

On page 2, we suggest the following products as an alternative for your consideration.

For further assistance, please contact your local TDK-Lambda sales department, or your usual field sales contact or via our web-site at <http://www.uk.tdk-lambda.com/> where you can also find data on all of our current products and our comprehensive product selector web tools.

Lauren Teeling  
Product Manager

<b>Model</b>	<b>Closest SMPS Alternative (Not Form, Fit &amp; Function)</b>
NNS155	HWS15A-5/A

NND15-1515	HWS15A-15/A * 2
NND30-1515	HWS30A-15/A * 2

#### Technical Notes

1. The HWS range are switch mode power supplies. NNS/NND are linear.
2. If remote sense is required, this is available on HWS100A-150A models only.
3. Parallel operation is not possible on HWS. Please select a higher powered HWS to increase current.
4. Remote programming is not possible on low power HWS.
5. For the NND series, two HWS power supplies are required to provide two output voltages.
